PROJECTS

PORTFOLIO WEBSITE (HTML/CSS/JAVASCRIPT)

- Designed and developed a personal portfolio website to showcase my skills and projects.
- Utilized HTML, CSS, and JavaScript to create an interactive and visually appealing interface.

REACT.JS MINOR PROJECT

INSTAGRAM CLONE

- The Instagram Clone project is a web application developed using React.js, aiming to replicate the core functionalities and user interface of the popular social media platform, Instagram. This project demonstrates my proficiency in React.js and showcases my ability to build dynamic and interactive user interfaces.

THE TODO LIST APPLICATION

- The Todo List application demonstrates my proficiency in React.js and showcases my ability to create functional and visually appealing user interfaces. It highlights my understanding of key React concepts and my capability to build small-scale projects with attention to detail and user experience.

MY SQL

- The Bookstore Management System project demonstrates my proficiency in MySQL and showcases my ability to design and implement a functional database system. It highlights my understanding of database concepts, data modeling, and SQL querying skills.
